Zenith Carburetor Paint

by Tom Endy

Up until recently the preferred paint to use on a Zenith carburetor was black LustreKote by Top Flite. However it is no longer available.

Black LustreKote is no longer available.

All is not lost! There is an even better alternative.

Brodak Mfg Co.
100 Park Ave. Carmichaels, PA 15320
724-966-2627
724-966-9131
www.brodak.com
No part number:
Ask for Butyrate dope in jet black
4oz can $8.99
16oz can 16.95

It does not come in a spray can. It is a dull black and it is fuel resistant. Brodak has to be brushed on, but it is even more fuel resistant than LustreKote.

Doesn't get any better than this

If you prefer a gloss black there is a fuel proof black paint available.

Sig mfg Co. www.sigmfg.com

Both paints are considered a Cellulose acetate butyrate dope and are both fuel proof.
