

(N) In this view from the rear, notice the dome light is placed above the back of the front seats, in center of roof. Lower quarter panels are padded slightly and the 3½ inch stitching that begins on the door is extended to rear of lower quarter panel to the back of the rear seat. Pleats in the seats do not continue to the back of the seat. Edges are separated by a strip of matching upholstery and two rows of small ½ inch beading.
