Hi Performance Coils

PRICED LOW! ONLY $5.75

GET THE MOST FROM YOUR ENGINE WITH THESE HIGH OUTPUT COILS

The extra-intense, extra-high voltage delivered by these coils is a "must" for anyone wanting top engine performance and economy. Pay for themselves in a few weeks! Use Hi-Capacity condenser for maximum efficiency and long breaker-point life.

HEAVY DUTY COILS

Gold Band Coils are priced low—yet they are carefully manufactured for high performance. Thoroughly tested and inspected at six different stages of manufacture . . . they reach you electrically perfect. Rigidly inspected and tested for HIGH output and low primary current consumption. High performance is assured by the delicate balance of the windings. Stops "bucking" and "skipping" of stock coils. For extra high voltage output, better mileage and performance, quicker starting . . . try one of these low cost coils. 6 or 12-volt models for all cars. With mounting bracket.

#3501—State voltage desired **$5.75**

YOU SAVE MONEY ON SO MANY ITEMS when you buy by mail from Newhouse—it's the easy LOW COST way to buy.

D.S.M. COIL

The distinctive "D.S.M." is known as the "Master" of all U.S.-built coils. Famous for its extreme efficiency. There is very little "current shrinkage" . . . which means high output with low input for long battery, generator and point life.

Supplies energy far in excess of engine needs, under the most extreme conditions. Universal mounting brackets.

#3510—6 Volt Coil.....**$19.50**
#3512—12 Volt Coil..... **21.50**

Special Mounting bracket for installing on 1949-53 Ford and Mercury.
#3514 .....**$ .75**

D.S.M. 700—Special distributor-mounted coil for 1941-48 Ford 6 and 1942-48 Ford V-8 and Mercury
#3517 .....**$6.95**

MALLORY COIL

NEW Mallory Voltmaster—Mallory's latest and BEST Coil. Improved design for faster starts, longer trouble-free service . . . more economical performance, too, because it provides a better balanced spark for high speeds or idling. Positively moisture-proof. Windings completely submerged in transformer oil. Ideal for use with stock, dual-point or dual-ignition systems. High-output assures perfect operation under all conditions. Eliminates "missing" from extra-high compression and from extreme speed. Sealed composition case protects windings — minimizes electrical leakage.

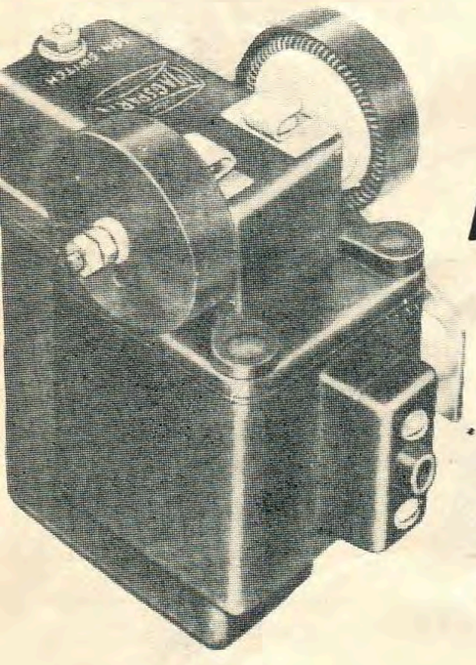

#3520—6-volt **$14.00**
#3521—12-volt **16.00**

Special mounting bracket for installing on 1949-53 Ford or Mercury.
#3522 .....**$ .75**

RUNBAKEN OIL COIL

Leading British racing men call this sensational new "Oil Coil" the FASTEST COIL IN THE WORLD. Produces 30,000 volts output . . . compared to the regular 10,000 to 12,000 volts of average coils. Provides absolutely dependable performance for all cars and trucks. This great English product improves firing power, gives quicker starting, greater acceleration, and increases pulling power under load. Heavy unbreakable transparent glass case, with clear mineral oil surrounding the windings and core. **Oil keeps moisture out, prevents internal arcing and keeps windings cool. Built exactly like oil-cooled, power-line transformers . . . carries a FULL TWO YEAR GUARANTEE.** Available in 6 and 12 volt models.

#3500 State voltage desired **$22.50**

Famous Mallory

MAGSPARK

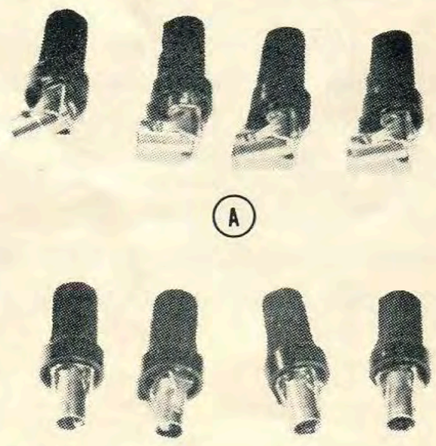

Produces a HOTTER, LONGER-DURATION Spark . . . that means complete combustion . . . better timing . . . stops spark-miss at high speeds

The Mallory "Magspark" Transformer is the latest and most revolutionary development in the ignition field. It combines the advantages of a magneto with those of a coil-operated system to give a truly "super-spark" . . . not only is the spark "hot," **but, more important, it is of LONGER DURATION.** Assures top operational efficiency at all speeds.

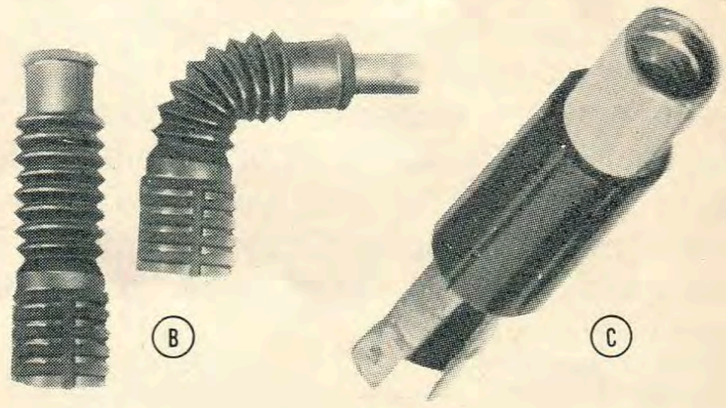

Contains double primary windings which work in opposition to each other . . . builds up a heavy charge . . . releases it at exactly the right time. **The Magspark replaces your coil and may be used on any car** . . . but only in conjunction with a Mallory Dual Point Distributor, or with a special Mallory Dual Point Breaker Plate in your stock distributor. Easy to install with directions furnished.

If you want the BEST, get Magspark. Available in 6 or 12 volt models . . . specify when ordering.

#3550 .....**$22.00**

Ⓐ

Ⓑ Ⓒ

Ⓐ RAJAH TERMINALS

High-quality Bakelite and brass terminals for a positive, "snap-on" connection between your spark plugs and the high-tension distributor wires. Rajahs will not vibrate-off. and will not corrode . . . you are assured of a proper connection at all times. Available in either the **Straight or 90°-angle types to fit all standard spark plugs and all ignition wire.** State choice when ordering.

#3570 .....**$ .49** each

Ⓑ TERMINAL COVERS

Deluxe, all-weather Terminal Covers keep your sparkplug porcelains and terminals clean and dry . . . **prevent ignition failure resulting from accumulations of dust, oil or moisture.** Completely flexible design covers plug porcelain, terminal and part of the high-tension wire . . . **eliminates "spark-leak"** . . . makes car start easier and battery last longer. **Universal fit.**

 # 3580 .....**$** .19 each

Ⓒ COIL BOOSTER

A compact device that helps increase the efficiency of your spark plugs. Fits into center hole of distributor or in coil outlet. The high-voltage current passing through its "electronic-resistor" is intensified, giving a hotter spark for better combustion, smoother idling and increased mileage. **Fits all cars.**

 # 3590 .....**$2.00** each
