WIPER	TR-C1A	TR-C1B
BODY FINISH	BLACK*	CHROME
KNOB FINISH	NICKEL	CHROME
KNOB TRADEMARK	No	No
COVER MOUNTING	Hook/1 screw	Hook/1 screw
SHAFT LENGTH	3/8"	3/8"

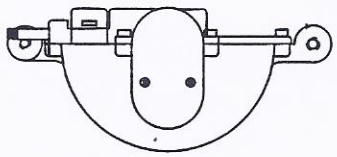

Principal Features:
- TR-C1A used on all closed models (except those listed for other vacuum wipers)
- TR-C1B used on Cabriolet (68-B), Deluxe Pickup (66-A) and deluxe heavy commercials (Ambulance, etc.)
- Both with or without waffle pattern on top of body.
- Mounted with threaded ears on outside of windshield

* Black finish is semi-gloss enamel

SEE TEXT FOR OTHER DETAILS

chrome plated. The diagrams in this section describe the finishes and correct use of vacuum wipers on all passenger cars and trucks. Original wipers can generally be recognized by the 1/2" deep front cover secured by two small screws (4-36). The halves of the wiper were held together by special flat-sided screws.

Vacuum Wiper Mounting

Slant Windshield Sedans and Cabriolets, Victorias, and Convertible Sedans used an inside mounted wiper held by the shaft collar. This wiper was also used on the Standrive and the Bus to September 1931. At that time, a larger wiper was introduced which was mounted both by the shaft collar and threaded bosses (ears) on each side. A black or chrome plated nut (finished to match the wiper) secured the wiper in place. On Slant Windshield Cabriolets and Convertible Sedans, the wiper shaft passed through the windshield frame. Moisture was sealed out by a flat rubber grommet compressed against the frame by a large chrome plated washer and the mounting nut. On other vehicles with shaft mounted wipers, the shaft of the wiper passed through the header above the windshield frame. A spacer was used over the shaft so that tightening the nut acted against the wood and not

WIPER	TR-C2A	TR-C2B
BODY FINISH	BLACK*	CHROME
KNOB FINISH	NICKEL	CHROME
KNOB TRADEMARK	No	No
COVER MOUNTING	2 screws	2 screws
SHAFT LENGTH	2-3/4"	2-3/4"

Principal Features:
- TR-C2A used on 160-A,B,C; 330-A, 315-A (to 9/31) and 190-A (after April 1931)
- TR-C2B used on Cabriolet (68-C), Convertible Sedan (400-A) and Victoria (190-A, until 4/31)
- All wipers have waffle pattern on top of body.
- Mounted with threaded sleeve through frame in an inverted position (curved side up)

* Black finish is semi-gloss enamel
