TIRE COVER (METAL)

Skinner Company of Oshawa, Ontario produced Lyon Tire Covers in Canada under license. The chrome metal cover had a very unique badge bearing a lion's head and "Made in Canada".

AREA 17 – TOOLS

GENERAL

Some Canadian produced open end wrenches, pliers and adjustable wrenches had an "E" or "E" in a circle trademark. The common trademarks found on USA tools were also provided with some Canadian vehicles.

Example of tools with a Circle E trademark

OIL CAN

The oil can was the same as used in the USA and was used through June 1928.

GREASE GUN

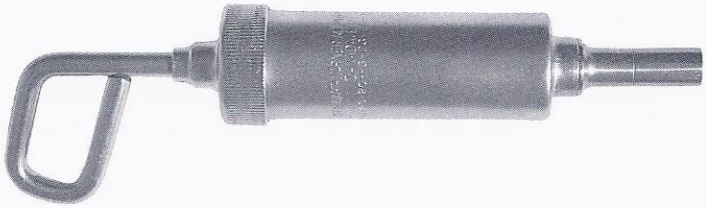

There were three styles of unpolished nickel plated grease guns:

- The first style grease gun had fine serrations on the cap and the cylinder was unmarked or marked ALEMITE LUBRICATOR, THE BASSICK MFG CO. or ALEMITE LUBRICATOR, ALEMITE CORP This design was used from the beginning of production through mid 1929.

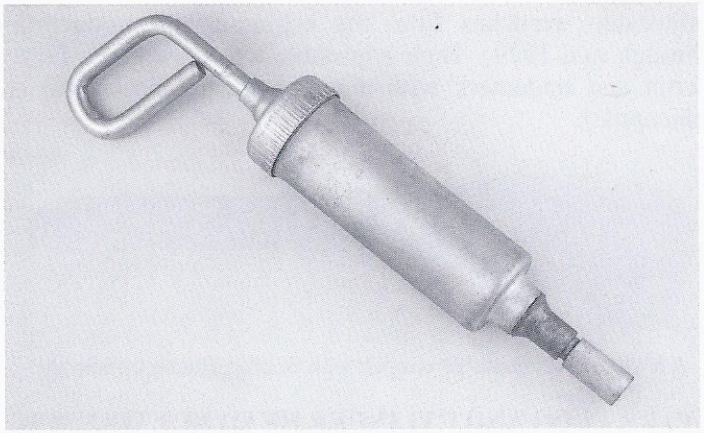

- Prior to Model A production, Stewart Warner purchased the Alemite Mfg. Company of Canada and the name was changed to Stewart-Warner-Alemite Corp Canada Ltd. Grease guns produced during mid and late 1929 were marked with "STEWART-WARNER-ALEMITE CORP, CANADA LTD." and patent dates "3-23-20--3-23-20--3-9-21". These continued to use a cap with fine serrations.
- The third style was introduced in late 1929 and had coarse serrations on the cap, and the cylinder was marked ALEMITE PRODUCTS COMPANY, CANADA LTD., 3-23-20--3-23-20--3-9-21 or ALEMITE LUBRICATOR, ALEMITE CORPORATION.

Grease gun with coarse serrations

TOOL BAG

There were several variations of tool bags used during Canadian production and varied depending on the region in which they were produced.

- Top material, surplus artificial leather or canvas tool bag with a triangular fold-over top and wrap-around cloth tie straps and was supplied throughout production.

Triangular fold-over tool bag with cloth tie straps
