FEATURES

Cab—3-man type, all-steel with level-action suspension.

Loading Height—32.64 inches with 6.50-16 tires.

Load Space—platform, 84.3 in. long x 71.28 in. wide; stake 80 in. long, 67 in. wide, 29.54 in. high stakes.

Platform—heavy, bridge-type construction. Heavy-gage steel framing riveted to steel cross girders. Seasoned hardwood floor planking, protected and interlocked by steel skid strips over joints which are bolted to cross girders of platform frame.

Pockets—set flush with floor, doubly reinforced; welded to inside of frame rail, riveted to outside.

Rub Rail—steel, around platform and steel caps on ends of body sills, afford protection when backing into or parking alongside loading dock.

Stake Racks—removable, sturdy, straight-grained hardwood—one-piece side and end sections, facilitating loading from rear or sides.
