Preface

This Model A Ford Technical Index was compiled from previously published articles from The Restorer, The Model A News, Model A Times, and Skinned Knuckles. It is intended to be a resource for the Model A hobbyist to independently retrieve technical articles. The user is requested to respect the contents here within and not abuse these contents nor use them for profit. The user is also asked to notify Tom Sieffert of any mistakes, omissions or enhancements that would make this index a better product for all. For copyright reasons Tom Sieffert cannot provide the actual articles.

This index will be updated periodically and can be viewed via the Internet at www.fordbarn.com on the Members Page. It is only available in .pdf format so that all PC users can access this file. Users can view this file on line, print it or even email it to a friend. Feel free to make as many copies as you want.

A special thank you goes out to Shelly, our Model A Lady, who has made it possible to have this index available on Ford Barn!
