VEHICLE IDENTIFICATION---Continued

VEHICLE CODE 5046 H-5507

This number is the code number of the entire vehicle. It indicates the vehicle model, the model year, the Branch at which the vehicle was built, and the consecutive number of the vehicle as it came off the assembly line.

The digits preceding the letter in this number indicate the model "50" "Ford Deluxe Tudor" and model year "46", 1946." The model number may consist of one, two or three digits, but the model year is always indicated by the last two digits of the number preceding the letters.

The letter "H" in this number indicates the vehicle was built at Home Office.

The group of digits in the vehicle code number that follows the letter is the consecutive job number of the vehicle. Each vehicle, irrespective of models, is consecutively numbered as it leaves the assembly line.

The consecutive job numbering starts anew with the first vehicle produced in each new model year.

Reference to the vehicle code number is essential when ordering service parts but must not, however, be used for licensing or registration purpose.

Sample vehicle number 5046H5507 is decoded as follows:
50 indicates Ford Deluxe Tudor (see following pages for complete model designations).
46 indicates the vehicle is a 1946 model.
H indicates the vehicle was built at Home Office.
5507 indicates the vehicle was the 5507th vehicle built at Home Office.

TRIM FOR FORD, MONARCH AND MERCURY MODELS

Passenger Models	Material	Colour	Part Number
Mercury 118	Cord	Rust	M-5085-M
